

Sanitary lever in fiberglass-enriched PA 6, high-elasticity reinforced nylon (PAHs-free). The light weight of this lever allows great precision in its positioning and prevents the accidental closing of the water-flow, that is a common problem of metallic levers.

Material PAHs free (*Polycyclic Aromatic Hydrocarbons*. It has recently been found that PAHs can be carcinogenic in case of prolonged skin contact).
PAHs testing is compulsory for GS Standard.

Professional ceramic-cartridge Ø35mm. limescale-resistant

Incorporated spout L.220mm.
(chrome-plated brass)

Flexible water supply hoses
L. 350 mm

Water-Output: 15 l/min
Fixing Hole on table top: Ø35 mm.
