DISHWASHERS FOR THE SMALLER WASH ROOMS

Clean dishes

– and a clear conscience

Wexiödisk^W

*Every installation
should be a
good reference.*

wexiodisk.com

Our ethos has always been that every dishwasher we develop should be more resource-efficient than the previous model.

Can you combine quality, green thinking and ergonomics?

At Wexiödisk our answer to this question is yes! We call it eco-design. Since we started in 1972 our philosophy has been to work with a focus on quality and sustainability and with the environment as a starting point. Without, of course, forgoing ergonomics and a good working environment.

Our vision is a circular economy, which means that the economic cycle is not linear but rather circular, with the focus on sustainable development. Wexiödisk develops high-quality products and carefully selects each component. All to help prolong a product's life cycle and conserve natural resources. Our ethos has always been that every dishwasher we develop should be more resourceefficient than the previous model.

FOR US, A CIRCULAR ECONOMY IS:

- w **A functional stainless steel design that delivers sustainability and a long service life.**
- w **Servicing is normally carried out from the front of the machine. Components can be accessed more easily, making servicing quicker.**
- w **We keep people in mind by including functions during the design stage that improve and make things easier for staff.**
- w **Reduced water consumption through SMART functions without compromising on wash results.**
- w **Heat recovery ECO-FLOW saves energy and improves the environment in the dishwashing room.**
- w **We are continuously striving to develop new solutions in order to save even more water and energy and further reduce the need for chemicals.**

Pursuing a **circular economy** has been an element of our Swedish brand since we started in 1972.

WD-4S

– compact, stylish and efficient

If you want a reliable and efficient undercounter dishwasher, then WD-4S is a smart choice. The Swedish design characterised by quality, functionality and clean lines is evident in every detail, meaning there's no need to hide WD-4S away.

HIGH-QUALITY SWEDISH DESIGN

The WD-4S dishwasher is designed to function optimally in as many kitchens as possible, and you can even install it in a bar or café. A clean design with limited details and smooth, rounded corners means improved hygiene and cleaner results. Furthermore, the door can be placed in a hygienic position that prevents the growth of bacteria when the machine is not in use.

WHICH MODEL WORKS FOR YOU?

In addition to our model BASIC, WD-4S is also available in a GLASS model that has been specially designed for washing glasses. The glasses are tilted in the open washing basket in such a way that less water collects on the foot of the glass and water does not run along its surface. The water jets reach all parts of the glass and drying results have also been improved.

WD-4S GLASS also features three specific glass washing programmes, where the washing time and water quantity have been adapted for different types of glasses. For example, there is a low temperature rinse that rapidly cools beer glasses for immediate use. Choose ECO-FLOW to save energy and improve the working environment.

HIGH CAPACITY

- WD-4S can wash up to 50 baskets per hour, i.e. 1,000 glasses, 900 plates or 450 trays.

ROBUST

- clean, simple and functional design in stainless steel.

DESIGN

- stainless steel side plates are included, enabling WD-4S to be completely free-standing.

LOW ENVIRONMENTAL IMPACT

- ECO-FLOW heat recovery saves energy and reduces drying time.

LIFETIME GUARANTEE

- for the main pipe.

TOUCH DISPLAY

- self-explanatory and angled touch display in tempered glass. The display also works if you are wearing gloves or have wet hands.

PERFECT WASHING RESULTS

- specially designed washing arms clean every millimetre of the dishware.

BASIC PROGRAMME

Programme 1: Glasses and cups, total washing time 1.2 min.*

Programme 2: Plates, total washing time 2.4* min.

Programme 3: Cutlery and pots, total washing time 4.2* min.

GLASS PROGRAMME

Programme 1: Beer glasses, total washing time 1.2 min.* with lower final rinse temperature, 65°C.

Programme 2: Standard glasses, total washing time 1.2* min., final rinse temperature 85°C.

Programme 3: Wine glasses, total washing time 2.2* min., final rinse temperature 65°C and increased water quantity for finalrinse.

*Factory setting. The washing time can be adjusted.

A kitchen staple

WD-6 and WD-7 are two of the market's best dishwashers for small and medium-sized kitchens.

WD-6 and WD-7 are our reliable hood dishwashing machines and are suitable for small and medium-sized dishwashing rooms. These machines focus on the user, with several technical features that make for a better working environment. With WD-6 and WD-7 you get ease of use, excellent ergonomics, high levels of hygiene, easy servicing and, last but not least, optimum washing results. You can rely on WD-6 and WD-7 every day of the year.

WHAT IS THE DIFFERENCE BETWEEN THE MODELS?

The difference between WD-6 and WD-7 lies in the fact that the latter is larger and used predominantly for larger items and more heavily soiled loads. WD-7 can also be used as a potwasher thanks to the lever that switches the water pressure between normal dishwashing and potwashing.

Washing space

WD-6: 545x405 mm (WxH) **WD-7:** 605x505 mm (WxH)

AUTOMATIC HYGIENE CONTROL

The control system with built-in HACCP ensures that current hygiene requirements are met. Web-Tool is available as an option for printing out external reports and connecting to a network.

WD-6 and WD-7 washing programmes

Programme 1: Total washing time 1.2 min.*

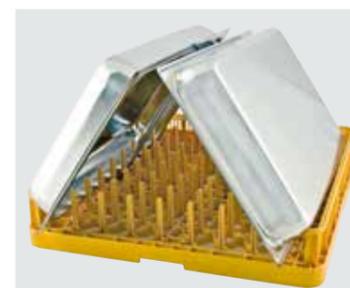

Programme 2: Total washing time 1.7 min.*

Programme 3: Total washing time 3.2 min.*

*Factory setting. The washing time can be adjusted.

WD-7

The washing space for WD-7 is wider and suitable for GN-containers.

WD-7 can also be used as a potwasher thanks to the lever that switches the water pressure between normal dishwashing and potwashing.

LOW ENVIRONMENTAL IMPACT

- ECO-FLOW heat recovery saves energy and reduces drying time.

ERGONOMIC

- the hood opens and closes automatically, eliminating the risk of strain injuries.

GOOD WORKING ENVIRONMENT

- the hood is angled upwards at the back so that the steam discharges at the back of the machine rather than out into the room.

EASY CLEANING

- the rinse nozzles on the stainless steel washing arms are concave to prevent blockages.

WATER SAVINGS

- large washing tank and efficient filters keep the washing water clean for longer

HYGIENIC

- high levels of hygiene with an automatic cleaning programme.

EASY SERVICING

- the machine can be serviced from the front.

The dishwasher with room for a little more

The WD-8 is a robust and reliable combidishwasher designed especially for washing baking trays, thermos boxes/transport containers and canteens.

The WD-8 is a further development of Wexiödisk's popular WD-6 and WD-7 dishwashers. Our new dishwasher retains the same good quality and functionality as the older machines and suits both small and medium-sized kitchens.

With its high-quality components, the WD-8 offers great reliability while its stainless steel construction makes for a sturdy and durable build.

A FLEXIBLE WORKHORSE

The WD-8 saves you both water and time, as there's no need to wash large bowls and canteens by hand. Boasting a large capacity washing compartment with a width of 695 millimetres and a height of 505 millimetres, this machine is specially designed for dishwashing larger items, but can also be used for glassware and cutlery as you can easily adjust the water pressure. This makes the WD-8 a highly flexible combi-dishwasher that can be used for both normal dishwashing and potwashing.

SMART OPTIONS

If you choose to add the foldable shelf option, you'll gain a flexible machine that can wash several baking trays at the

same time. Another useful option is the automatic hood lift with no need to manually raise the hood after each wash – your shoulders will thank you for it! The ECO-FLOW option uses the energy from the steam to heat the water for the next wash, which both saves energy and minimises the amount of steam in the washing room.

HIGH-QUALITY SWEDISH DESIGN

A good working environment, high levels of hygiene, easy servicing and optimum wash results make the WD-8 one of the best-equipped dishwashers on the market in its sector.

You can rely on the WD-8 every day of the year.

The combi-dishwasher WD-8 handles larger cooking utensils such as bakery trays, pots and pans by using the foldable shelf.

Thermos boxes, GN 1/1-canteens and washing baskets (500 x 500 or 500 x 600 mm) are placed directly into the machine without using the shelf. The water pressure is easy to adjust!

ERGONOMICS

- the hood opens and closes automatically (option), eliminating the risk of strain injuries

LOW ENVIRONMENTAL IMPACT

- ECO-FLOW heat recovery saves energy and reduces drying time.

GOOD WORKING ENVIRONMENT

- the hood opens and closes automatically (option), eliminating the risk of strain injuries.

HIGH CAPACITY

- extra large washing compartment measuring a full 695 mm in width.

EASY MANAGEMENT

- highly flexible in the kitchen. A simple lever switches the water pressure between normal dishwashing and potwashing.

FLEXIBILITY

- add the foldable shelf and you can even wash baking trays and other bulky items.

HYGIENIC

- high levels of hygiene with an automatic cleaning programme.

EASY SERVICING

- the machine can be serviced from the front.

WD-8 washing programmes

Programme 1: Total washing time 1.2 min.*

Programme 2: Total washing time 1.7*

Programme 3: Total washing time 3.2*

*Factory setting. The washing time can be adjusted.

Limited space yet great results

save time, water and energy

OPTIMISE DISHWASHING LOGISTICS WITH PRM

Our unique PRM pre-rinse machine pre-rinses items efficiently and replaces manual rinsing. You can save time and water, avoid splashes of water on the floor and improve ergonomics. Reduce repetitive strain injuries by doing away with the monotonous movements associated with using a hand shower.

FEWER CHEMICALS AND IMPROVED ENVIRONMENT

PRM rinses the items from above and below using an unbeatable method that removes even tough food residues such as oil and dressings. This enables you to reduce the washing time and use fewer chemicals. Reducing the amount of chemicals ensures a more gentle wash and also leaves glasses clearer.

The water used in the PRM pre-rinse machine is recycled water from the dishwasher. A smart solution that saves both water and energy. Being able to reduce the amount of manual work and at the same time improve the working environment is, of course, equally important.

150 WORK HOURS TO USE ELSEWHERE

With a PRM solution you can put dirty dishes straight into the washing baskets without pre-rinsing with a handheld spray unit. You don't need to wash items straight away either. PRM's efficient rinse action can handle even dried-on food residues, which means that washing can wait.

Unloading and sorting units can help you to achieve an efficient flow of items from the dirty to the clean side, and you can avoid slippery floors caused by splashes of water from a hand-held spray unit.

PRM pre-rinse machines can be connected to both WD-6, WD-7 or WD-8.

Save approx. 150 work hours each year in the kitchen, and eliminate 35,000 monotonous movements if washing an average of 100 baskets per day. All this time can be used for other important work in the kitchen.

STRAIGHT INSTALLATION

SAVE WATER AND ENERGY

- maximised water efficiency with a pre-rinse machine rather than a hand shower.

PERFECT DISHWASHING RESULT

- spotlessly clean dishes every day, all year round, with minimal use of detergent.

GOOD LOGISTICS

- simple and ergonomic operation and optimised dishwashing logistics.

CUSTOMIZATION

- decide whether you want the flow of items to run from the right or left.

CORNER INSTALLATION 1

CORNER INSTALLATION 2

The bar dishwasher

that makes work easier

SMART DISPLAY

With three programmes, the WD-4S is easy to use. The self-explanatory and sloping display in tempered glass provides a clear overview of the washing time from a distance. Colours indicate the status of the wash and a sound indicates when washing is complete. The smart display also works if you are wearing gloves or have wet hands.

GOOD HYGIENE LEVELS

With the new WD-4S the door can be placed in a space saving hygienic position that prevents the growth of bacteria when the machine is not in use, e.g. over long weekends or during holidays.

VERSATILE AND EFFICIENT

A push of a button allows you to easily replace the water so you can switch between washing dirty plates and washing glasses and trays. Having the two functions in the same machine saves both space and time.

Both WD-4S BASIC and GLASS are available with a bottom frame (lockable or open) with guide rails for three baskets.

Izakaya Moshi

— a love of Japanese cuisine

Izakaya Moshi was opened in December 2012 by Sandra Bertilsson and Daniel Djurvall. “We wanted the people of Växjö to have a Japanese restaurant serving food with clean flavours and beautiful colours.”

Izakaya, which means ‘slink in’ in Japanese, seats 70, and the restaurant has received numerous accolades, including a listing in White Guide 2019.

WHEN FOOD BECOMES AN EXPERIENCE

There are no secrets in the open kitchen. The restaurant's sole purpose is to convey a love of Japan's fantastic cuisine. Izakaya moshi uses locally produced ingredients from farms in the surrounding area.

“We have also been incredibly lucky in employing excellent staff, both for front of house duties and in the kitchen.

Our chefs are extremely creative, and enjoy experimenting and developing our food concept, enabling

us to constantly surprise our diners with new colours, shapes and flavours. A complete experience that focuses on food – it's that simple!”

CLEANER GLASSES WITH WD-4S

Just recently the restaurant invested in a new under-counter dishwasher from Wexiödisk, a WD-4S.

“We opted for a glasswasher model, with two special glass washing baskets. The glasses are tilted in the basket, which leaves them drier after washing. We also don't need to wipe any water marks from them. We use the machine to wash other bar accessories, too.

SANDRA BERTILSSON

” **The flow in the bar has changed completely, and we can keep dirty dishes out of the sinks. Everything is much more hygienic.**”

One litre of water with **DUPLUS**

Is it possible to clean dishes using just one litre of fresh water per washing basket? Yes, it is! Thanks to our patented DUPLUS technology that reduces water consumption to next to nothing.

The secret is to use water from the previous washing cycle during the first rinsing phase. The second rinsing phase

uses one litre of fresh water at a temperature of 85°C. The rinsing water from the second phase is collected for use in the next washing cycle.

DUPLUS is the ideal choice for anyone aiming for minimal environmental impact from dishwashing.

Duplus is available as an option for both WD-6 and WD-7.

Recover heat with **ECO-FLOW**

Have you ever opened a dishwasher door and got hot steam in your face? Our new undercounter dishwasher WD-4S is now available with ECO-FLOW – a smart heat recovery system which means you can avoid the discomfort of steam in your face. This is particularly important when the machine is located in a bar or is visible to customers. ECO-FLOW works by using the energy from the steam

to heat the water for the next wash. This minimises the amount of steam and reduces the need for ventilation in the room. Drier air is also blown over the items in the machine, meaning they dry far more quickly and effectively. ECO-FLOW has been developed to save energy, as well as to provide an improved working environment.

ECO-FLOW is available as an option for our WD-4S, WD-6, WD-7 and WD-8 machines.

PM & Vänner, Emil Bolmgren

Big savings per year with **PRM & DUPLUS**

- 200,000 litres of water
- 9,800 kWh energy when using warm or hot water
- The environment benefits, with 5,200 kg less CO2 being produced
- 150 work hours
- Less detergent is used
- Improved working environment with less water on the floor
- Reduction in daily water changes
- Dishwashing staff are spared 35,000 repetitive hand movements associated with manual pre-rinsing that can cause occupational injuries
- Dishwashers have a larger capacity

Scan the code to calculate your savings when washing dishes with a PRM

What's the best dishwasher for your kitchen?

WD-4S

Fast wash with high capacity. Perfect for the smaller kitchen or bar.

- ▶ Robust and safe, giving perfect dishwashing results
- ▶ Clear and self-explanatory touch-screen display in tempered glass
- ▶ Hygienic, space saving door design
- ▶ ECO-FLOW option to save energy and improve the working environment

WD-4S GLAS

Clean glasses with less polishing.

- ▶ Fine dining glass dishwasher with special designed glass basket
- ▶ Robust and safe, giving perfect dishwashing results
- ▶ Clear and self-explanatory touch-screen display in tempered glass, 3 glass programs
- ▶ Hygienic, space saving door design
- ▶ ECO-FLOW option to save energy and improve the working environment

WD-8

Flexible and extra wide for bulkier goods.

- ▶ Automatic cleaning programme
- ▶ Angled hood so that steam rises up the back of the machine
- ▶ Extra large washing compartment
- ▶ Automatic hood (optional)

WD-PRM6/7/8

Save time, water and energy with our PRM pre-rinsing machine.

- ▶ Optimise dishwashing logistics
- ▶ Maximise water savings
- ▶ Minimise use of detergents
- ▶ Highly ergonomic with many user benefits

WD-6

The workhorse of the kitchen! Suitable for small and medium sized venues.

- ▶ Unique hood concept
- ▶ Easy to handle, ergonomic and service-friendly
- ▶ Save energy and drying time with the optional ECO-FLOW
- ▶ Over 50,000 machines of this model currently on the market

WD-6 DUPLUS

Patented wash technology with minimal environmental impact!

- ▶ Double final rinse with patented DUPLUS technology
- ▶ Unique hood concept
- ▶ Use just 1 litre of fresh water per wash
- ▶ Save energy and drying time with the optional ECO-FLOW

WD-7

Flexibility for small to medium sized restaurants.

- ▶ Easy changeover between heavily soiled and normal dishes
- ▶ Unique hood concept
- ▶ Easy to handle, ergonomic and service-friendly
- ▶ Save energy and drying time with ECO-FLOW (optional)

WD-7 DUPLUS

Patented wash technology with minimal environmental impact!

- ▶ Double final rinse with patented DUPLUS technology
- ▶ Unique hood concept
- ▶ Use just 1 litre of fresh water per wash
- ▶ Save energy and drying time with the optional ECO-FLOW
