

FilterQuick®

with FQ4000 easyTouch® Controller
Automatic Filtration and Optional
Oil Quality Sensor

Electric Fryers

Fingertip Filtration Plus:

40% Less Oil, 10% Less Energy, Outstanding Results

1. **30-lb, 60-lb or 80-lb open frypot design** requires 40% less oil and ensures quick and easy cleaning. Saves money, time and labor.
2. **Independent frypot construction** allows convenient frypot repairs in the field, if needed.
3. **FQ4000 easyTouch® Controller** has operation management features that monitor and help control food quality, oil life, and equipment performance. Offers configurable and customizable recipe management, and connectivity compatible.
4. **Safe, self-standing heating elements** ensure industry leading energy efficiency and sealed rotation housing protects against oil migration.

5. **Fingertip, closed cabinet, fully-automatic filtration** starts with easy touch operating actions.
 - Safe technology ensures only one frypot can drain at a time. Filtration is as easy as pushing a button.
 - The filter pump agitates the oil in the frypot before draining to lift the crumbs from the bottom of the frypot, aiding their removal.
 - The frypot begins heating as soon as a safe level of oil returns to the frypot to speed return to set temperature.
 - The pump is protected by a pressure relief valve for bulk oil systems.

6. **Optional Oil Quality Sensor (OQS)** monitors the oil's health and advises when to discard. No more guesswork.
7. **Innovative safety features** offer proprietary advantages over other fryers that prevent simultaneous vat filtrations.
8. **Automatic Top-Off (ATO) feature** senses the oil level and adds oil as needed from an in-cabinet supply.

FilterQuick fryers exceed ENERGY STAR® guidelines for high efficiency and are part of the Welbilt EnerLogic® program.
