# INTRODUCING THE NEW SC-60 SCISSORS JIG!

We are proud to present the SC-60 Scissors Jig – our latest innovation for sharpening scissors. It is the first dedicated scissors jig compatible with the Tormek T-2 Pro Kitchen Knife Sharpener, bringing a new level of precision and control to scissor sharpening.

The SC-60 Scissors Jig features **robust clamps** and **vibration-dampening materials** for a secure grip and smooth operation. The **hexagon-patterned sliding surface** ensures steady movement and helps keep the jig clean and efficient during use. The sharpening angle is easily set using the **guide** on the back of the holder, allowing for quick and consistent 60° settings. The jig is protected by a pending patent application.

When used with the Tormek T-2 Pro Kitchen Knife Sharpener, the SC-60 Scissors Jig can sharpen scissors with a blade length of up to 120 mm (measured from the pivot point to the tip). Longer scissors can be sharpened only if they can be disassembled, allowing each blade to be sharpened separately.
