

SUPER MINI

THE ORIGINAL Super Mini has the same basis as our professional machines: the multi boiler technology. The brewing unit is separated from the boiler and it is the same as used for the evo2 and the dc pro.

YOUR PERFECT CUP Discover the full potential of an espresso blend: the brewing temperature can be regulated to whatever degree you like. Every coffee tastes different at different brewing temperatures, find your sweet spot.

SMALL PROFESSIONAL Designed for small places, it is the ideal choice for houses, offices, restaurants and bakeries. Super Mini can be connected to the water supply.

LEAD FREE All parts exposed to water are in lead-free alloy (CW510L), certified by NSF - National Science Foundation. Construction materials are totally recyclable.

SUPER MINI

dimensions (w x h x d)	320 x 500 x 410 mm
weight	33 kg
connected load	230/240 V 1 Ph, 115 V 1 Ph - 50/60 Hz
