Intelligence at the tip of your finger...

ClimateControl

ClimateControl ensures best-in-class performance, controlling the air, heat and humidity levels.

It optimises processes and even shortens baking times. The result is consistent uniformity and predictably high quality.

QSR

QSR, Quick Select Recipes, is a tailored, smart interface giving you peace of mind knowing that any member of your team will perform to the highest standards with the same consistency, less waste and maximum throughput. This saves time and prevents errors.

CareCycle

Select between seven different cycles from Light to Intense, Turbo or Eco. The Invoq oven guides you through the process and suggest the optimal cleaning program and required amount of cleaning tablets for the desired cycle. This ensures that the ratio of detergent to water is always correct and you avoid overconsumption.

SmartBaker

SmartBaker helps you learn from the oven to develop your signature style. You select type of products and the baking method, and SmartBaker will automatically guide you to a great result. Afterwards, you can save and, if necessary, edit the process.
